

## REACH Registration statistics

### All Countries \*

Data as of: 31/12/2022

\* EEA (EU27, Norway, Iceland and Liechtenstein) + UK(NI)

#### Overall Summary

#### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	101 428	22 265	16 596

#### Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	79 653	12 969	15 783
registered as intermediate	20 087	9 908	2 643
<i>Transported isolated intermediates</i>	15 564	7 298	2 459
<i>On-site isolated intermediates</i>	5 621	4 105	789
NONS Notifications (claimed but not updated)	2 839	2 282	503

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies
Registrations in Joint Submissions	94 029	17 203	16 279
<i>Lead</i>	18 009	N/A	N/A
<i>Member</i>	76 020	N/A	N/A

#### Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	1 332	804	325
registered as intermediate	464	437	45
<i>Transported isolated intermediates</i>	392	370	42
<i>On-site isolated intermediates</i>	91	91	20
NONS Notifications (claimed but not updated)	7	7	4

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	26	17	9
registered as intermediate	1	1	1
<i>Transported isolated intermediates</i>	1	1	1
<i>On-site isolated intermediates</i>	1	1	1

## REACH Registration statistics

### Ireland

Data as of: 31/12/2022

#### Overall Summary

##### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	7 855	3 264	2 574

#### Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

## REACH Registration statistics

### Norway

Data as of: 31/12/2022

#### Overall Summary

##### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	491	329	111

#### Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	402	259	107
registered as intermediate	72	64	22
<i>Transported isolated intermediates</i>	51	48	18
<i>On-site isolated intermediates</i>	25	23	10
NONS Notifications (claimed but not updated)	19	19	3

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies
Registrations in Joint Submissions	463	302	110
<i>Lead</i>	51	N/A	N/A

## REACH Registration statistics

### Sweden

Data as of: 31/12/2022

#### Overall Summary

##### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	3 047	1 934	531

#### Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	2 594	1 636	489
registered as intermediate	454	366	116
<i>Transported isolated intermediates</i>	358	287	113
<i>On-site isolated intermediates</i>	130	104	25
NONS Notifications (claimed but not updated)	9	9	7

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Data as of: 31/12/2022

#### Overall Summary

##### REACH registrations by companies from 1st June 2008

The following table shows the currently valid registrations granted by ECHA following the submission of a registration dossier or due to the existence of a NONS notification.

	# Registrations	# Substances	# Companies
Registrations	79	74	15

#### Detailed Registration Statistics

REACH covers different types of registrations: Full registrations (Art.10) and Intermediates (Art. 17&18). A substance can be registered for up to three registration types with one dossier. Therefore the numbers below do not add up to the total number of registrations. Furthermore, notifications made by companies under the previous chemicals legislation (Directive 67/548/EEC - NONS Notifications) are considered registered under REACH. However, those NONS which were not claimed by any company by the deadline of 17/07/2022, were revoked by ECHA and they are not reported in these tables. NONS that were claimed, may be updated (ECHA has received a dossier submission under REACH) or not. In the tables below, NONS notifications which were claimed but not yet updated, are reported separately, while NONS notifications which were claimed and updated are reported either under "registered as full registration" or "registered as intermediate".

Breakdown by Registration Type	# Registrations	# Substances	# Companies
registered as full registration	66	61	15
registered as intermediate	14	14	2
<i>Transported isolated intermediates</i>	10	10	2
<i>On-site isolated intermediates</i>	13	13	1
NONS Notifications (claimed but not updated)	0	0	0

#### Joint Submission is a fundamental principle of REACH. Its aim is to reduce costs and avoid unnecessary testing on animals

This table provides a breakdown of the number of registrations submitted in a joint submission (multiple registrants) compared to individual submissions (single registrants).

Breakdown by Joint Submission role	# Registrations	# Substances	# Companies
Registrations in Joint Submissions	79	74	15
<i>Lead</i>	5	N/A	N/A
<i>Member</i>	74	N/A	N/A
Individual Registrations	0	0	0
NONS Notifications (claimed but not updated)	0	0	0
TOTAL	79	-	-

Breakdown by Registrant Company Size	# Registrations	# Substances	# Companies
Registered by Large company	65	63	11
Registered by SME	14	14	4
<i>Medium company</i>	0	0	0
<i>Small company</i>	5	5	3
<i>Micro company</i>	9	9	1
TOTAL	79	-	-

Breakdown by Role in Supply Chain	# Registrations	# Substances	# Companies
Importer	46	41	10
Manufacturer	29	29	4
Manufacturer and Importer	2	2	1
Only Representative of a non-EU manufacturer	2	2	2
NONS Notifications (claimed but not updated)	0	0	0
TOTAL	79	-	-

Breakdown by Tonnage Band	# Registrations	# Substances	# Companies
>1000t	28	28	7
100-1000t	9	9	3
10-100t	11	11	7
1-10t	18	18	7
Intermediate only	13	13	1
NONS Notifications (claimed but not updated)	0	0	0
TOTAL	79	-	-
