

| SECTION IIIA 2   | IDENTITY  | Official use only |
|--|---|-------------------|
| IIIA 2.1<br>Common name proposed or accepted by ISO and synonyms                         | Copper sulphate   |                   |
| IIIA 2.2<br>Chemical name  | Copper II sulphate pentahydrate   |                   |
| IIIA 2.3<br>Manufacturer's development code number(s)                                    | Not applicable  |                   |
| IIIA 2.4<br>CAS No and EC numbers  | Heading only.   |                   |
| IIIA 2.4.1<br>CAS No   | 7758-99-8.  |                   |
| IIIA 2.4.2<br>EC(EINECS) No  | 231-847-6.<br>Listed on annex I of 67/548/EEC - index number 029-004-00-0   |                   |
| IIIA 2.4.3<br>Other  | All copper compounds have the CIPAC code 44<br>The CIPAC code for $\text{Cu}^{2+}$ ion is 029<br>The CIPAC code for $\text{SO}_4^{2-}$ ion is 306   |                   |
| IIIA 2.5<br>Molecular and structural formula, molecular mass                             | Heading only.   |                   |
| IIIA 2.5.1<br>Molecular formula  | $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$   |                   |
| IIIA 2.5.2<br>Structural formula   |    |                   |
| IIIA 2.5.3<br>Molecular mass   | 249.68  |                   |
| IIIA 2.6<br>Method of manufacture of the active substance                                | The method of manufacture is confidential to Manica SpA and is presented in the confidential attachment under Point IIIA 2.6.   |                   |
| IIIA 2.7<br>Specification of the purity of the active substance, as appropriate          | The copper sulphate pentahydrate produced by Manica SpA will have a purity of <span style="background-color: black; color: black;">XXXXXXXXXX</span><br><br>The exact specification of purity for copper sulphate pentahydrate is confidential to Manica SpA and is included in the confidential attachment under Point IIIA 2.7. |                   |
| IIIA 2.8<br>Identity of impurities and additives, as appropriate                         | Information concerning impurities and additives in copper sulphate pentahydrate is confidential to Manica SpA and is included in the confidential attachment under Point IIIA 2.8.  |                   |
| IIIA 2.9<br>The origin of the natural active substance or the precursor(s) of the active | Sulphuric acid is obtained as a commodity chemical. The copper used is in the form of high grade copper scrap.  |                   |
